FOR IMMEDIATE RELEASE

GSR Media is a multi-layered divisional company focused on creating original content driven products, programming and production services while fulfilling distribution requirements through its e-commerce based website at www.gsrmedia.com.

The company recently opened in the spring of 2010 by launching two of the first five divisions with the remaining three divisions scheduled to open later this year. They are as follows:

GSR Music An independent Christian music label providing tools for artists that otherwise might not have the ability to record their music and have it distributed to a global audience. Industry veteran and master musician, producer and engineer Allen Cuffey is guiding this effort by mentoring talented musicians, bands, composers and singers that encompass many different genres of music.

GSR Music is breaking down industry label stigmas that stifle the creative gifts or more importantly; prevent them from ever being heard. Once recorded and mastered, the artist's songs are marketed and presented to radio stations, print, broadcast, web and most importantly to the consumer. The label currently has 8 acts on the roster with three new releases coming out in conjunction with the company's launch and two more to follow later this spring.

GSR Productions: Having already opened its doors with GSR Music and equipped with a state of the art 96 track recording studio, GSR Production offers many audio post production services along with video editing, animation and digital photography. Additional audio services include music scoring for television and film, professional voice over's, live or remote recording, corporate and business presentations, CD duplication and much more.

GSR Publishing: Up and running by late spring 2010 and will act as a supportive arm to GSR Music. GSR Music will assign ISRC codes to masters insuring accurate royalty reporting. GSR Publishing will administrate all artist royalty statements and handle all licensing requests to ensure current rate payments and timely royalty accounting back to artist and/or artist representative. These services can also be sub-contracted for pre-existing catalogs or products.

GSR Radio: Scheduled to open later this spring. GSR Radio will develop and distribute original content and programming offering information designed to enhance lives through practical presentations in education, business, politics, family, arts and entertainment, today's church and the media.

GSR Radio is producing their first program "**Divine Intervention**" that is currently being picked up by a dozen stations on the east coast of the U.S. This division will also be offering Pod casting services and live streaming in the near future.

GSR TV / Commercial / Corporate: This division will complete the company vision in the summer of 2010. GSR TV will offer a full range of services that will have the ability to take the client from concept to completion. GSR TV draws on over 20 years of experience with major television networks, leading commercial advertising campaigns, various multi-media and industrial programming while successfully translating these programs into multiple languages for worldwide distribution.
